OVERVIEW

STRUMEX

About

STRUMEX is a global manufacturer of high-strength structural components for mining equipment, founded in 2007 and headquartered in Shanghai, China.

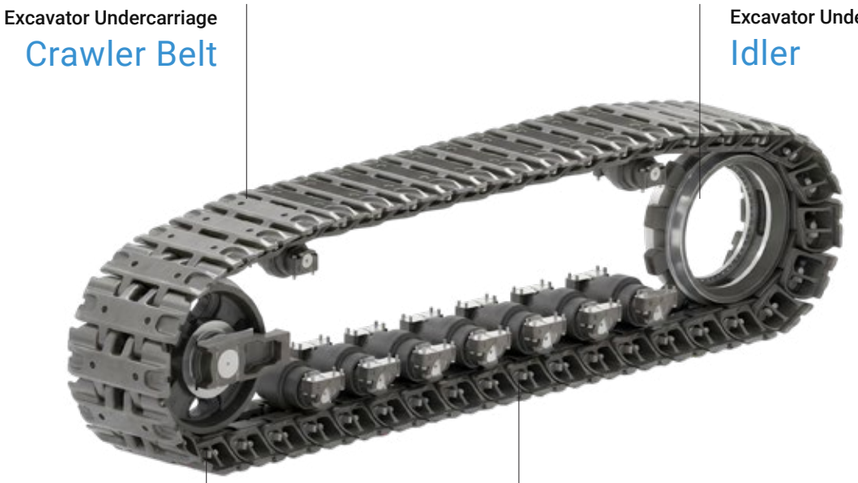
Strength in Every Component

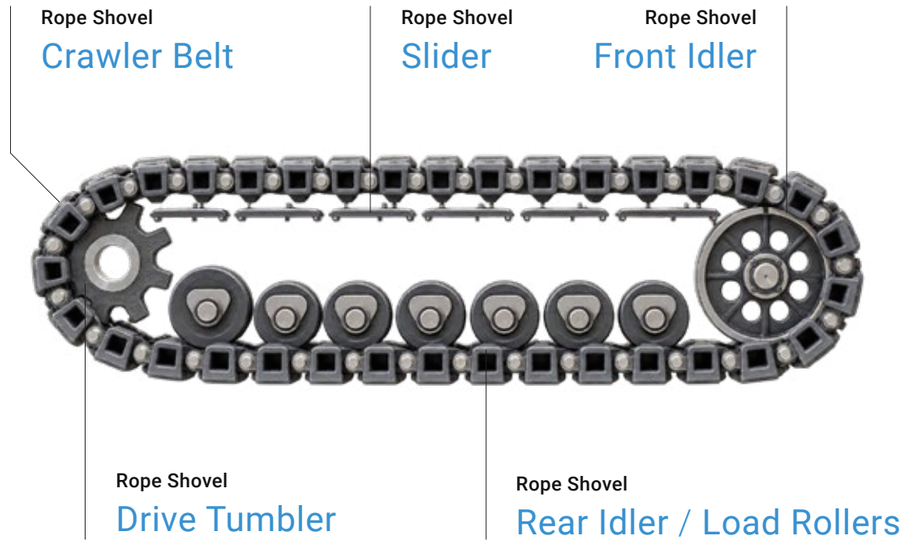
STRUMEX operates an integrated manufacturing facility combining advanced electric arc furnace steelmaking, AOD refining, heat treatment, CNC machining, and final assembly.

Every step is controlled under ISO 9001, ISO14001, ISO45001 quality management to ensure dimensional accuracy, material traceability, and consistent mechanical performance.

STRUMEX Manufactures four primary product lines: Caterpillar, Liebherr, Komatsu, and Hitachi. for the global mining equipment market.

What We Product





STRUMEX

MINING EXCAVATOR
PARTS

Engineered for Extreme Durability

Mining machinery is built to endure some of the toughest working conditions on earth. From reinforced steel frames to precision-engineered undercarriage parts, every component is designed for maximum durability. These machines deliver consistent performance in extreme heat, cold, dust, and pressure, ensuring operators can rely on them day after day without compromise.

Compatible Brands

Manufacture Excellence

To deliver high-performance components — built with precision, engineered to endure in the most extreme environments.

With deep expertise in metallurgical engineering, precision casting, and CNC machining, STRUMEX delivers world-class undercarriage systems to mining operations across 6 continents.
